KNOW THE FREQUENCY OF YOUR MAGNETIC FIELD

INTRODUCTION

As a Geomant, Budisatva, and seer, I invite you to know and be more aware in a clear, simple and practical way of this method that for years I have practiced and taught according to Nosis or inner knowledge, this is necessary in the human being to balance , save yourself, move forward, and evolve by uniting, transcending the "Semsemaforas" or as we call it in Buddhism the "AKASHA" name of God, ("The logos") which is unpronounceable according to various cultures and the power to see and create past, present, future and realities or chain of positive events in your life.

In history, humanity tries to explain it in different ways (Solomon's table) (Table met), Sambala's staff of wisdom, book of DZYAN, apocryphal books such as the book of enoc or The Kolbrin Bible, Gnostic Gods as Abraxas , Hebrew kabalas, the Vedic texts of the immortals ... among others. And many of many incomplete forms practice it making it part of a collective consciousness that does not end up living it completely, since either it is practiced incompletely, or it is done once and then forgotten, or it is read with skepticism and It is taken as light reading. We cannot continue in the prison of the mind if you want to live in balance.

The mind always separates and seeks absolute truths for convenience, creates the world of convenience and ends up sectorizing, separating and consequently unbalancing, freaking out and making humanity sick, in fact many of these books call it hidden or forbidden reading because it can drive madness. mind, but this is also a manipulation.

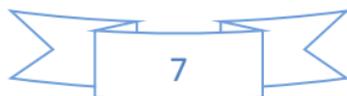

I have always felt that the human being was born with the ability and power to balance and develop himself and live harmoniously with himself, with his planet, with the universe and manage the power of his energy wisely.

"This is a neo-logistic knowledge that, let's say it clear, has always passed between discrete lodges, which although at the beginning were normal old lodges in charge of protecting and spreading this knowledge in human beings especially in the ancient eastern world, they were transformed into lodges Discreet, because they are not recognized under some statutes of power imposed, or rather, those that control those who have the high power to say this lodge enters and is left out of oblivion, they are also lodges as a "society of fog "...

In other words, all those societies that currently govern the entire theme of the lodges and what they do are also a lodge.

That is why things are allowed, they handle this ancient knowledge and they are in charge of twisting it, limiting it, ridiculing it for a whole social structure of power control. Well, I'm going to leave it that short but of course.

"Science without faith" is a thing ", that is, science needs spirituality and vice versa, YIN / YANG, must be in balance so as not to physically, spiritually and mentally make the human being sick, this is something that complements us, that we It helps to move forward.

Of course, when science becomes dogmatic, it is dangerous, and the same

goes for the mystery of spirituality when it becomes dogmatic, it is also dangerous.

We have to know how to discern the balance, not as truths, since to a truth, it will always be eclipsed in the future by a greater truth, but all past, present and future truths respect freedom and balance with the way of feeling and living the universe of each human being, the internal experiences of each human being are shared if they want and are free and should not be dogmatized or imposed since everyone has their own time to digest, live and understand them. As a person with a certain clairvoyance that I am and who has been dedicated to studying geomancy, the Vedic texts the
